# NIP IT IN THE BUD UNTIL EVERYTHING BLOSSOMS.

Mahindra winter implements are a great choice for efficiently clearing snow until the spring thaw. Engineered for long-lasting durability, they deliver reliable performance, allowing you to focus on restoring your parking lots, driveways, and roads while improving safety and mobility.

Here, we've eliminated the guesswork by matching all current-selling Mahindra tractors to available Mahindra winter implements. But if you are a novice, no worries! There are 450 Mahindra dealers ready to assist you in finding the right implement.

# FRONT-MOUNTED SNOW BLOWERS

## MAINTAINING DRIVEWAYS, PARKING LOTS, AND ROADS

Mahindra front-mounted snow blowers, powered by a mid PTO-connected belt drive system, allow operators to quickly blow powdery and wet snow at a great distance and in one pass. Commercial-duty models are used in airports, churches, hospitals, city roads, schools, and shopping centers, while residential-duty blowers rapidly clear home driveways and sidewalks. Consider adding on a cab, snowdrift cutters, headlights, and a remote-controlled spout deflector.

### FEATURES & BENEFITS

- Stout auger and impeller, with shear bolt protection and heavy-duty gear box, aggressively chops and disperses snow and ice
- 10- and 12-gauge housing with double-walled bottom base and reversible and replaceable scrape blade help protect snowblower housing against damage
- 48- to 66-inch models Include long-lasting, zero-maintenance 2-inch timing belt to eliminate vibration and minimize noise
- Adjustable and replaceable skid shoes for gliding over various terrains with ease

# REAR-MOUNTED SNOW BLOWERS

## MAINTAINING DRIVEWAYS, PARKING LOTS, AND ROADS

Mahindra rear-mounted snow blowers, PTO-powered using a 3-point connection, allow operators to blow powdery and wet snow quickly at a great distance and in one pass. Commercial-duty models can be used in airports, churches, hospitals, city roads, schools, and shopping centers, while residential-duty blowers rapidly clear home driveways and sidewalks. Consider adding on a cab, snowdrift cutters, headlights, and a remote-controlled spout deflector.

Be sure to ask about our eMax / MaxXL (SKU No. BERMXCAB) or a 1600 Series (SKU No. BERXLCAB) 360°-degree clear view soft cab.

### FEATURES & BENEFITS

- Heavy-duty auger and impeller with shear bolt protection, aggressively chops and disperses snow and ice
- Double-walled bottom base and reversible and replaceable scrape blade help protect snowblower housing against damage
- Adjustable and replaceable skid shoes glide over various terrains with ease
- Choose between manual hand crank model (R) or electric for both rotation and deflector adjustment (RE) or hydraulic rotation with manual deflector (RH) On hydraulic chute models, upgrade to electric chute rotation (freeing up a hydraulic connection)

# SKID-STEER SNOW BLADES

CLEAR BARNs, DRIVEWAYS, PARKING LOTS, AND ROADS

Mahindra skid-steer snow blades are stellar performers at farms, churches, neighborhoods, shopping centers, and other venues that operate many front attachments. Not just for snow, these blades remain firm on the ground at all times, removing vast amounts of aggregate in a single pass while leaving behind strategically placed windrows. Use for back dragging, too, getting very close to curbs, garages, or other structures.

## FEATURES & BENEFITS

- For manual adjustment blades, we offer five locking left and right positions from 0° to 25° degrees
- Equipped with trip spring protection system to help prevent blade and tractor damage
- Heavy-duty steel, adjustable and replaceable skid shoes, and reversible and replaceable scraper bar for long product life
- Scraper blades float and tilt 5° helps maintain ground contour contact

## SPECIFICATIONS

BLADE FEATURES	62-INCH	72-INCH
Connector Type	Skid Steer

# SKID-STEER SNOW PUSHES

## PUSH, BACK DRAG, AND STACK SNOW OR OTHER DEBRIS

If you want to avoid making windrows, a Mahindra skid-steer snow push is your best bet to contain, push and stack snow. What's more, its commercial-duty enclosed design has no moving parts that can break or malfunction. It's quicker at clearing snow in a parking lot than its snow plow cousin, and is great for moving other materials, too, including manure and food in feedlots. Snow pushes can be found working around farms, parking lots, city and side streets, and other venues that operate many skid-steer attachments.

### FEATURES & BENEFITS

- Strong steel housing, durable skid shoes and reinforced side plates capture and remove even the heaviest snow without leaving windrows or spillover
- Reversible and replaceable steel cutting edge designed to clear snow on concrete and asphalt
- Optional pull back kits for back dragging snow from buildings, fences and confined areas
- Optional marker kits for increased plow edges visibility
