ROXOR

(Note that not all Mahindra dealers carry ROXOR)

MORE EFFICIENCY WITH LESS DOWNTIME

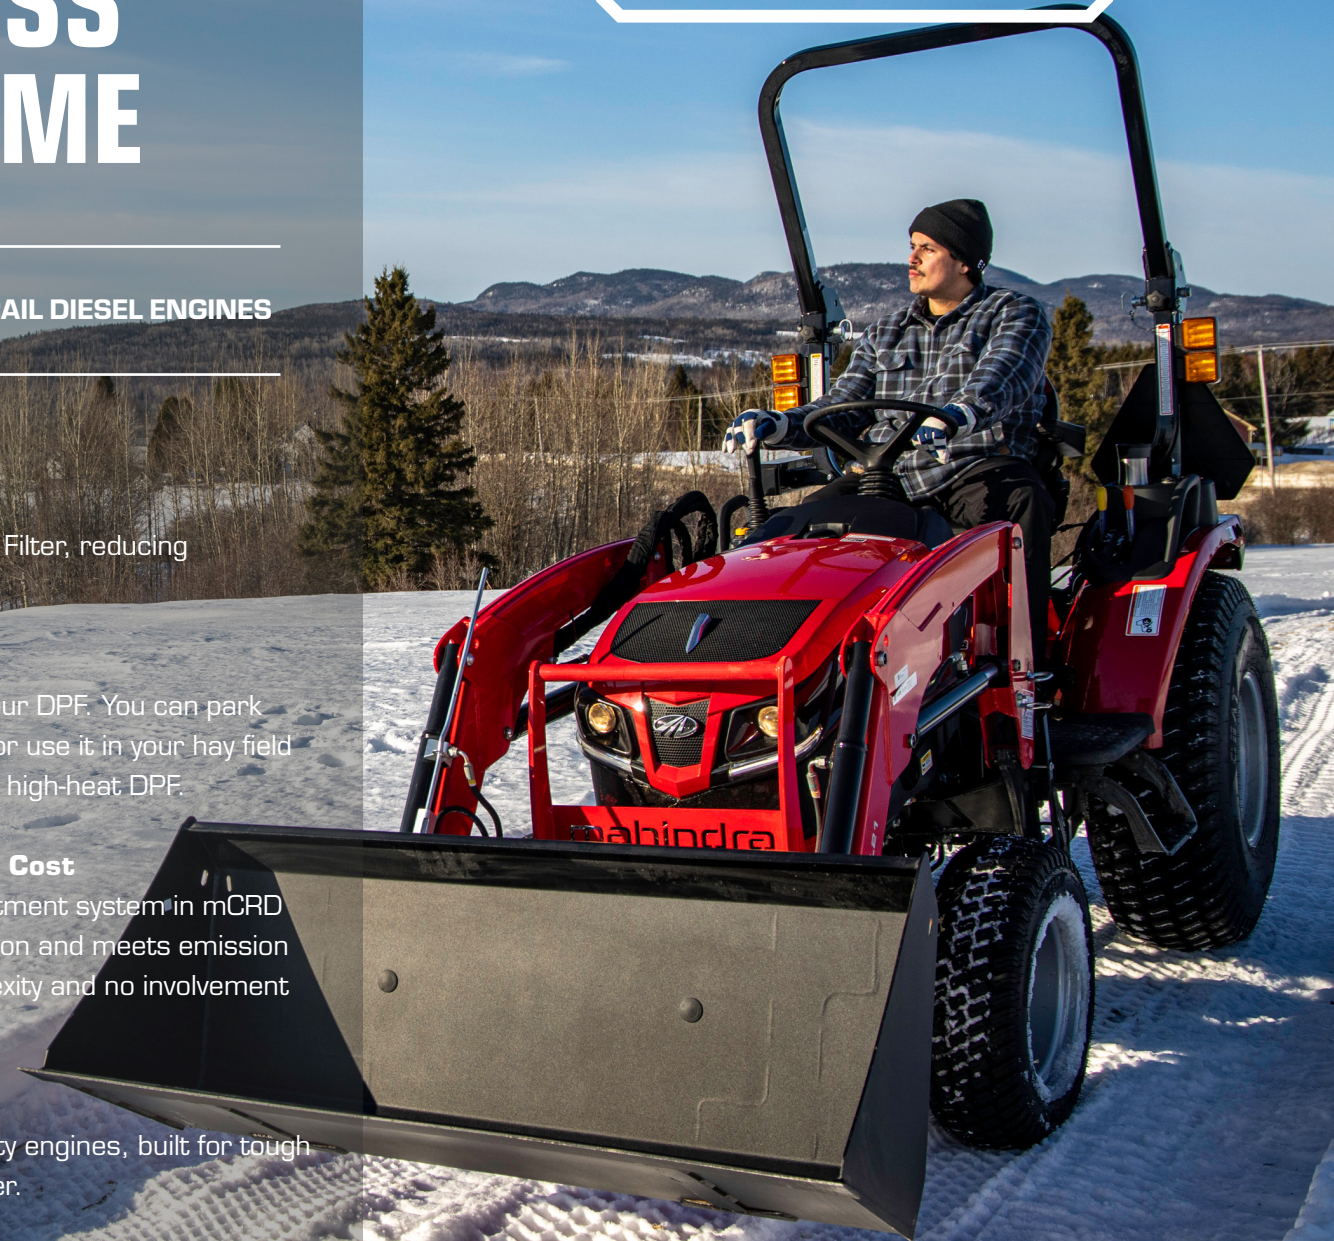

MAHINDRA COMMON RAIL DIESEL ENGINES

- **Less Complexity**
mCRD does not have a Diesel Particulate Filter, reducing complexity, heat and filter replacement.
- **No Operator Involvement**
You don't need to remember to service your DPF. You can park your mCRD-equipped tractor in the barn or use it in your hay field without worry, because we don't have the high-heat DPF.
- **Cleaner Exhaust Emissions at Lower Cost**
Diesel Oxidation Catalyst (DOC) after-treatment system in mCRD does not require any high heat regeneration and meets emission standards at lower cost, with less complexity and no involvement from the operator.
- **Heavy-Duty Wet Sleeve Engine**
mCRDs are modern wet sleeve, heavy-duty engines, built for tough jobs. mCRD: Cleaner, Greener and Simpler.

In computing sales numbers, Mahindra uses the definition of "tractor" or farm tractor formulated by the Association of Equipment Manufacturers in the United States, the largest association of equipment manufacturers in the United States. In addition, with respect to computing world-wide sales, Mahindra includes tractor sales under different brand names such as Swaraj, but all of the Mahindra tractors are designed by, engineered by and manufactured and assembled by Mahindra.
